

Hey! 🖐️

I hope this message finds you well. My name is Snir, and I want to share with you my story. For the past six years, I've had the privilege of working as a **graphic designer** & a **frontend developer**. It has been an incredible journey filled with passion, creativity and challenges.

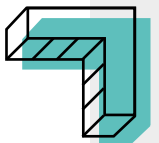

During my time as a graphic designer, I've come to understand that the traditional approach to hiring a full-time designer can be inefficient for several reasons. It often involves high costs, limited flexibility, and the challenges of finding the right talent. This realization led me to take a leap of faith and open my own design agency - but with a twist.

At Creative Carrot, we replace unreliable freelancers, costly employees and expensive agencies for one flat monthly fee that you can pause or cancel anytime. We understand that businesses often require ongoing design work, but the commitment of hiring a full-time designer is probably not the best decision to make. With our service, you get access to a talented team of designers without the overhead costs.

I invite you to take a look at some of the recent projects we've completed. You can find examples of our work at creative-carrot.com

I would love the opportunity to learn more about your upcoming design projects and how we can tailor our services to meet your requirements. Please feel free to reach out to me directly at design@creative-carrot.com
